## 1.1. Typst equation showcase (<- explainer)

This is inline  $f(x) = a \cdot x^2 + b \cdot x + c$  equation. You cannot number not reference inline equation.

This is an example of equation which have numbering and you can reference it.

Entropy:

$$H(S) = \sum_{n=1}^C -p_i \cdot \log_2(p_i) \quad (1)$$

Equation (1) shows how entropy is calculated. For math symbols check Typst documentation on math/symbols.

## 1.2. Another Typst references (<- explainer)

We explained this in Section 1. This is a test reference to a section.

This is a test cite [1].

This is a test cite of more than one reference [1], [2], [3].

Bachelor thesis should have 40 standard pages (recommended). One standard page is defined as 1800 characters per page. This is calculated as 30 rows  $\times$  60 characters per row. You can also calculate it as ~250 words per standard page. This means that you need ~10,000 words for this document.

There is total of 2872 / 10000 words in this document to fullfil the requirements of the thesis. Note that there are so many words because of lorem ipsum text. Also note that the accuracy of the word count is not perfect, but it is good enough for this purpose.

RESUME is present only in theses which are not written in Slovak/Czech language. So for example, if your thesis is in English, you need to write a resumé in Slovak. Resumé should be around 10% of the thesis length.
